

Mr. Rodney Shelton

Computers & Technology Teacher

First year with St. Peter School
1 year teaching experience

Technology is changing so fast all around us. I want to prepare our students not only to keep up with the changing tech world, but be prepared to interact and lead the way! I am excited to join the family at St. Peter and work together with everyone to make sure our kids have the best possible year and education. I'm sure the students will challenge me as much as I intend to challenge them in learning and growing.

My teaching style:

I want to build relationships that both challenge and push the students to realize there are no limits in what they can accomplish in any subject.

Get to know me...

After student teaching at Quincy Notre Dame, I received my B.S. in Mathematics from Quincy University in May of 2017. Prior to that I have worked with FedEx Express and Procter & Gamble at industrial jobs based around technology that relied on

computers and software knowledge. I also worked locally in youth ministry, where I discovered my love of children and sharing information and teaching!

I have a wonderful wife, Sheri, since September of 2010, and we are blessed to

share in raising 5 great children! In my free time I enjoy Sci-fi, athletic activities, and spending time with my family.
